

## Transformer with Zigbee controller

| Technical specifications                   |  |
|--|--|
| Input voltage                              | 230 Volt AC  |
| Output Voltage                             | 12 Volt DC   |
| Wattage                                    | 15 Watt  |
| Dimensions                                 | 102 x 35 x 16 mm   |
| Type                                       | 2000 mm lead with CEE plug<br>100 mm lead with LED distributor 12-fold |
| Installation                               | with screws  |
| Remarks                                    | voice control with Alexa Echo+ or other Zigbee controllers             |
| Intended for the following light source(s) | LED  |
| Efficiency in full-load                    | $\geq 82 \%$   |
| No-load power                              | $< 0.5$ Watt   |
| Dimmable                                   | no   |
| Weight                                     | 140 gram   |
| Replaceability                             | by qualified persons   |
| Waste disposal                             | through suitable disposal site   |
